

# AlcoSense<sup>®</sup> VERITY

Personal breathalyser

Built in mouthpiece

Compact and portable

Fuel Cell Sensor provides accurate readings

# AlcoSense<sup>®</sup>

## VERITY

Designed and made for you. The AlcoSense Verity is lightweight, compact and very easy to use, providing highly accurate alcohol-specific readings within seconds. Features a built-in mouthpiece for personal testing and comes in a variety of colours. Perfect gift for yourself, friends or family.

### Breathalyser Specifications

Indication of %BAC	0.00% BAC to 0.40% BAC
Accuracy	+/- 0.01 at 0.10% BAC
Warm-up Time	3 seconds - 4 minutes
Response Time	Within 10 seconds at 0.10% BAC
Recycle Time	10 seconds
Mouthpiece	5 mouthpieces supplied, built-in mouthpiece
Sensor Type	Fuel cell sensor
Power Supply	4 x AAA alkaline batteries
Weight	66g including batteries
Dimensions (mm)	100 high x 44 wide x 15 deep
Remarks	<ul style="list-style-type: none"><li>• Back-lit LCD screen</li><li>• Flow control</li><li>• Auto power off</li></ul>
Calibration	Manufacturer Recommended: Australian Standard Requirement: 6 months
Accreditation	Certified DOT Approval

### Facts

Drinking impairs a number of key sensory systems in the body including:

- Vision
- The ability to track changing conditions
- Perception - sensory relationships (touch, sight, sound)
- Concentration - effects our ability to focus on driving
- Psychomotor skills- resulting in slower reaction times

As Blood Alcohol Concentration (BAC) rises, so does the risk of being involved in a vehicle crash or a workplace accident.

0.05 = double the risk

0.08 = 7 times the risk

0.15 = 25 times the risk

The way to avoid these is simply not to drive if you feel tired and know your concentration is not at its best. Estimating your BAC is often inaccurate so use AlcoSense<sup>®</sup> Verity Breathalyser to get instant, accurate indication of your BAC.

AlcoSense<sup>®</sup> Verity is distributed in Australia by Andatech Corporation Pty Ltd.
